**Subject:** More questions I remember receiving from the public or press

Dear Kellie,

Thank you for your thorough list of questions. So we don't have to take up time on the call, I wanted to email you a few more questions I remember that I have received in the past. Most of these questions I have heard multiple times.

1. Will the Navy do subsurface core resampling down to groundwater?
2. Will the Navy look at all the Tetra Tech work including the complete history going back in time?
3. Why are the cleanup goals and workplan not following the EPA guidance to protect down to  $10^{-6}$  using the PRG calculator and without a durable cover?
4. Didn't Tetra Tech also do work at Treasure Island? So couldn't all the same problems on Treasure Island be happening at Hunters Point too? And vice versa?
5. Battelle did some work in Treasure Island. That was a problem. How could you let them work at Hunters Point?
6. Is the Navy hiring former Tetra Tech workers at Hunters Point to oversee rad cleanup?
7. Across the country, has the Navy given Tetra Tech any new contracts to do rad work since this problem came to light?
8. What are you doing about locations outside the Superfund site boundaries but where workers reported radiation spills?
9. Former Hunters Point workers (including my family members, neighbors, or friends) have been exposed to radiation. Then they got sick and/or died. What will you do about that?
10. Why did it take whistleblowers to discover the problem? [Note: In Feb, 2016, the NRC issued its Notice of Apparent Violation that described a supervisor ordering a technician to swap samples in 10-15 instances on Parcel C for the purpose of under-representing the true extent of contamination. NRC notified the Navy and EPA then. This was before the March, 2016, NBC news segment with Anthony Smith.]
11. Will the Navy give funding for independent community technical advisor to study the process in all its technical details? And to take split samples?
12. Will the Navy restore the RAB?
13. Please give me the agendas, minutes, and participants list from the technical meetings of the Tiger Team?
14. Why is the Mayor holding Tiger Team meetings without community participation? Are you making deals with the developer behind closed doors?
15. Will my property values go down?
16. I have been living in this neighborhood for decades. Can you test the blood or hair or fingernails of me and my neighbors for radiation?

Lily Lee  
Cleanup Project Manager
